Information about the presence of substances or products that cause allergies or intolerances is available from the staff on duty.

In each dish, the allergens present are identified by means of a numerical legend referring to the list in the appendix as per EC Reg. no. 1169/2011.

The Haccp procedures adopted take into account the risk of cross-contamination and staff are trained on this risk. However, it should be noted that, in some cases, due to objective requirements, preparation and serving activities may involve sharing areas and utensils; therefore, the possibility of products coming into contact with allergens cannot be excluded.

In order to guarantee freshness, depending on seasonality/availability, some products are blast chilled to - 18° C.

Allergens in bread and leavened products 1, 3, 5, 6, 7, 8, 10, 11, 12.
